

# Represent functions graphically

**1** Here is a graph for the sequence  $3n + 1$

a) Use a graphing program to plot the line  $y = 3x + 1$

b) What is the same about the graphs?

---

---

c) What is different about the graphs?

---

---

**2** Use a graphing program to plot each of the following pairs.

a)  $y = 4x$      $y = 3x - 1$

What do you notice about the lines?

---

---

b)  $y = -4x$      $y = 6 - 5x$

What do you notice about the lines?

---

---

c)  $y = 3$      $y = -5$

What do you notice about the lines?

---

---

3 Use a graphing program to plot these lines.

a)  $y = \frac{x}{2} + 3$

c)  $y = \frac{x+3}{2}$

b)  $y = 0.5x + 3$

d)  $y = x^2 + 3$

What are the similarities and differences?

Explain how this links to linear and non-linear sequences.

---

---

4 Compare the graphs of  $y = x^3$  and  $y = 3x$ .

a) What are the similarities and differences?

b) Which graph is linear? \_\_\_\_\_

c) Which graph is non-linear? \_\_\_\_\_

5 Plot the graphs to compare the equations.

$y = 2x$	$y = x^2$	$y = x^2 + 2$	$y = x^2 - 2$
----------	-----------	---------------	---------------

☐☐☐☐

$y = 2x^2$	$y = 2^x$	$y = \frac{2}{x}$
------------	-----------	-------------------

☐☐☐

Tick the equations that show linear graphs.

6 How can you tell from an equation whether a graph is going to be linear?

---

---

7 Tick the equations that will produce a linear graph.

a)  $y = 2x - 5$  ☐

h)  $y = \frac{x}{2} + 5$  ☐

b)  $y = 5 - 2x$  ☐

i)  $y = \frac{1}{2}x + 5$  ☐

c)  $y = 2(x - 5)$  ☐

j)  $y = 5 - \frac{1}{2}x$  ☐

d)  $y = x^2 + 5$  ☐

k)  $y = 2x$  ☐

e)  $y = 2x^2 + 5$  ☐

l)  $y = \frac{x}{2}$  ☐

f)  $y = 0.2x - 5$  ☐

m)  $y = \frac{2}{x}$  ☐

g)  $y = -5 - 0.2x$  ☐

n)  $y = 2$  ☐

Check your answers with a graphing program.
