

# Use factors to simplify calculations

1 Tommy wants to multiply 26 by 6

a) Talk to a partner about why the bar model helps Tommy.

26	26	26	26	26	26
52		52		52	
156					

b) Fill in the missing values on the bar model.

Do the calculations mentally.

c) Explain why multiplying by 2 and then by 3 is the same as multiplying by 6

2 × 3 = 6

---

---

d) How else could you work out 26 × 6 mentally?

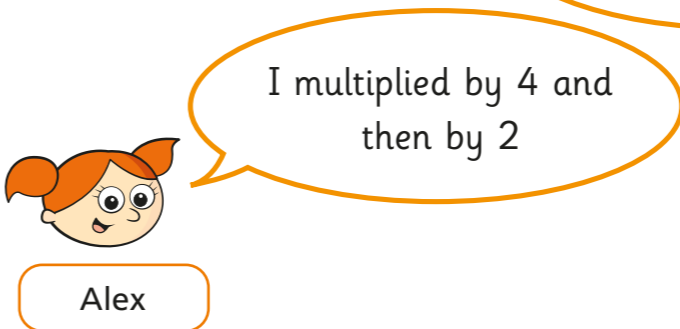

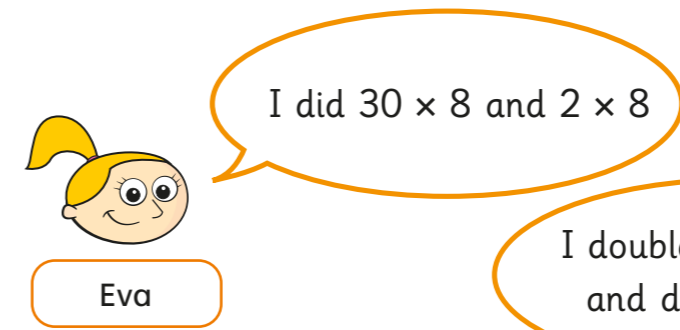

e.g. 25 × 6 + 1 × 6

---

---

2 Eva, Mo and Alex are multiplying 32 by 8

a) Explain why Mo's method works.

You may draw a diagram to help.

$$32 \times 8 = 32 \times 2 \times 2 \times 2$$

b) Work out  $32 \times 8$  using each method.

256

Which method did you prefer?

3 a) Write the factors of 24

1, 2, 3, 4, 6, 8, 12, 24

b) Use factors to work out  $24 \times 25$  in your head.

600

c) Write the mental calculations you did to show how you worked this out.

Various answers

---

---

4 Tick the calculation that does **not** give the answer to  $32 \times 18$

$16 \times 9 \times 2 \times 2$	$8 \times 8 \times 9$	$9 \times 8 \times 2 \times 2 \times 2$	$30 \times 2 \times 10 \times 8$
<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>

a) Use one of the correct calculations to work out  $32 \times 18$  mentally.

576

b) Which one did you use and why?

Various answers

5 Here are three methods for working out  $24 \times 12$

Multiply 24 by 6 and then by 2	Multiply 12 by 12 and then by 2	Multiply 12 by 8 and then by 3
--------------------------------	---------------------------------	--------------------------------

Tick the method you prefer. Various answers

Talk to a partner about why you prefer this method.

6 Complete the calculations.

a)  $37 \times 20 = 37 \times 2 \times 10 =$

b)  $16 \times 40 = 16 \times 2 \times 2 \times$    $=$

c)  $30 \times 49 = 49 \times$    $\times$    $=$

d)  $32 \times 300 = 32 \times$    $\times$    $=$

7 Find three different ways to multiply 16 by 50 using factors.

e.g.  $16 \times 5 \times 10$   
 $4 \times 25 \times 4 \times 2$   
 $8 \times 2 \times 50$

8 The bar model helps you divide 264 by 6

Work out  $264 \div 6$

44

9 Use factors to work out these divisions mentally.

Show each step of your thinking.

a)  $124 \div 4 =$

c)  $276 \div 12 =$

b)  $352 \div 16 =$

10 Show that 80 divided by 24 is equal to  $3\frac{1}{3}$  using factors.

$80 \div 24 = 80 \div 8 \div 3 = 10 \div 3$   
 $= \frac{10}{3} = 3\frac{1}{3}$
