

Understand and use the intersection of sets

1 Here are two sets: A and B.

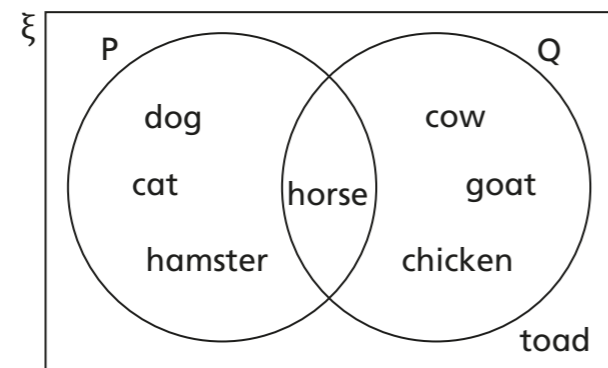

- a) Shade the region that represents $A \cap B$.
- b) Describe what $A \cap B$ means.

2 a)

Write the elements of $A \cap B$. _____

b)

Write the element of $P \cap Q$. _____

3

$\xi = \{1, 2, 3, 4, 5, 6, 7, 8, 9\}$
 $A = \{1, 3, 5, 7, 9\}$
 $B = \{1, 4, 9\}$

a) Complete the Venn diagram to show the information.

b) Use your Venn diagram to work out $A \cap B$. _____

c) Which description best describes the elements of $A \cap B$?

Tick your answer.

- square numbers odd square numbers
 even numbers odd numbers

4

$A = \{0, 5, 10, 15, 20, 25, 30\}$
 $B = \{0, 2, 4, 6, 8, 10, 12, 14, 16, 18, 20\}$

a) Work out the elements of $A \cap B$. _____

b) Discuss with a partner how to describe the members of $A \cap B$.

- 5 Explain why the Venn diagram represents the information.

$\xi = \{\text{letters of the alphabet}\}$
 $A = \{\text{consonants}\}$
 $B = \{\text{vowels}\}$

- 6 The Venn diagram shows the number of students in a school who own a cat or a dog.

a) How many students own a cat and a dog?

b) How many students own a dog?

c) How many students do not own a cat?

- 7 Here are three sets: A, B and C.

Some letters have been placed in different regions.

List the elements of:

a) $A \cap B = \{\text{_____}\}$

b) $B \cap C = \{\text{_____}\}$

c) $A \cap C = \{\text{_____}\}$

d) $(A \cap B) \cap C = \{\text{_____}\}$

- 8 60 people were asked whether they liked tea and coffee. The results are shown in the two-way table.

	Like	Do not like
Tea	41	19
Coffee	38	22

27 people like both tea and coffee.

a) Draw a Venn diagram to represent this information.

b) How many people do not like tea or coffee?
